MADE IN GERMANY!

MORE THAN 70 YEARS OF WRITING EXPERIENCE

Benefit from more than 70 years of experience in producing pens for promotional needs.

Ritter Pen was founded in 1928! We have been manufacturing writing instruments of the highest quality, in the heart of the idyllic Odenwald, for more than 70 years now. From the idea and the CAD drawing for our own tool making, to the plastic injection molding and the printing – everything is under one roof.

The production is completely tailored to the customers' wishes and only takes place after the order is received. Pens are printed and assembled in the desired, corporate identity-compliant color scheme with the appropriate refill.

Sustainable management is particularly important to us. True to the motto »The journey is the destination«, we continuously take measures to reduce CO₂, to conserve our resources and to increase efficiency: Such as the use of recycled and bio-based materials, the conversion of lighting to LED technology throughout the company and the installation of a state of the art photovoltaic system, with an annual output of almost 500.000 kwh.

STEP BY STEP INTO A SUSTAINABLE FUTURE!

R

IN JUST A FEW STEPS TO YOUR INDIVIDUAL PEN

Whether online, using our convenient penbuilder, or the traditional way with our new product catalog – in just a few simple steps, you can design your own custom ballpoint pen:

01 MODEL

SELECT
YOUR MODEL

09800

02 COLOR

CONFIGURE YOUR
DESIRED COLOR:

Mix & Match allows any color combination within the standard colors. Let your creativity run free and choose the right color to match your logo.

03 REFILL

CHOOSING THE REFILL:

Whether medium point or our soft refills for smooth, comfortable writing, black or blue ink – you can equip all of our »Made in Germany« pens with your preferred refill.

04 YOUR LOGO

With the **LOGO UPLOAD FEATURE** in our penbuilder, your design is then perfect – create the corresponding PDF file and get your first impression of your individual Ritter-Pen.

THE JOURNEY IS THE DESTINATION

SUSTAINABILITY IS A LIVED PHILOSOPHY AT RITTER-PEN.

In addition to many measures, such as producing a large part of our electricity needs with our own photovoltaic system, using green electricity, and utilizing LED technology, we recycle sprues, scraps, and defective parts in our production process.

THIS IN-HOUSE RECYCLING PROCESS CONSERVES OUR RESOURCES AND PROTECTS OUR CLIMATE AND THE ENVIRONMENT.

The models made from **POST-CONSUMER RECYCLED ABS MATERIAL** – sourced from disposed and reprocessed household and electronic devices – contribute optimally to the circular economy and reduce the use of new materials. Additionally, this recycled material saves about 80% energy compared to the use of conventional new materials.

In cooperation with »dm stores«, used product separators from dm stores are recycled and processed into new writing instruments. Post-consumer recycling at its best for our new **LIFT RECYCLED**.

For our new **ULTRA RECYCLED** refill, we use 95% recycled polypropylene. The refill tube and plug are made from post-consumer recycled material sourced from packaging waste, resulting in up to 80% less environmental impact and 75% less CO2 emissions compared to comparable new materials.

In addition to recycled materials, alternative materials are the second major component of Ritter-Cares' product range. New to the assortment is the innovative material **PHA**, which is used for the Level Biobased model. **PHA** is fully biodegradable and is produced through microbial processes from natural raw materials. It decomposed, both under industrial and home composting conditions and is considered a particularly sustainable alternative to conventional plastics.

Besides recycling, alternative materials are the second major component of the Ritter-Cares range: The proven, bio-based material »cellulose acetate« is completely biodegradable and certified according to DIN EN 13432:2000-12. **PLA** is a starch-based bio material, derived from natural raw materials and can be easily colored.

The development and processing of natural, alternative and recycled materials is a sustainable step towards the future.

THIS IS HOW WE CONSERVE OUR RESOURCES AND PROTECT OUR CLIMATE AND ENVIRONMENT!

SUSTAINABILITY
#NEXTLEVEL**

RITTER CARES

LEVEL

Sustainability at its finest best – With the LEVEL BIOBASED, RITTER-PEN presents its first ballpoint pen made from PHA, a biobased material that is compostable under natural conditions.

„Sleeping Giant”: an apt expression for the enormous potential of this material innovation. Through bacterial fermentation, plant oils and organic waste are converted into high-quality biopolymers. The result: a sustainable material with a unique tactile feel – soft, grippy, and pleasantly heavy in the hand. The housing, clip, and push button are made entirely from PHA.

Together with the environmentally friendly Ultra Recycled large-capacity refill, a writing instrument is created that sets new standards in design, quality, and sustainability.

A close-up photograph of a person's lips, which are coated in a highly reflective, glossy red lipstick. A red pen with a silver metal tip is positioned vertically, with the tip of the pen touching the center of the lower lip. The background is a soft-focus view of the person's nose and skin. The word "GLOSSY" is overlaid in large, white, sans-serif capital letters across the middle of the image.

ADVVER

SCREEN PRINTING

The required film for screen printing must be applied in the correct direction, for BASIC & VOLUMES color prints with register crosses. Colors will be printed according to your color specifications (Pantone, HKS, RAL). Please consider the following for half tone prints: Screen is halftone 40 (40 lines per centimeter), Halftone is between 20% and 80%. Caution: Despite the optimal matching of all imprinted components, imprints on metal pens are only partially scratch resistant.

PAD PRINTING

The film must be side inverted. Color specifications (Pantone, HKS, RAL) are required. Please consider the following for halftone prints: Screen is halftone 48, (48 lines per centimeter), Halftone is between 20% and 80%.

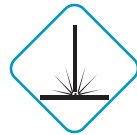

- Minimum line thickness for films (screen and pad imprint) is +0,15 mm and -0,3 mm.
- Regarding screen- and pad-prints according to color specifications (Pantone, HKS or RAL) on colored barrels, please consider that it might be necessary to print white background (i.e. one additional printing color)

Caution: Despite the optimal matching of all imprinted components, imprints on metal pens are only partially scratch resistant.

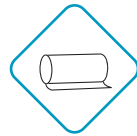

ETCHING

The required film for etching must be applied in the correct direction. The etching on the surface will appear grey/brown depending of the coloration on the underlying material. Variations within one production is possible. Please note that for every 2000 pcs. etchings, we require one film (e.g. for 10,000 pcs. etchings, 5 films are required Please note: Maximum line thickness of texts and logos is 1.2 mm.

LASER ENGRAVING

For laser engraving we need high resolved files (look at „FILES“). Please note: Maximum line thickness of texts and logos is 1.2 mm.

DIGITAL FOIL

An image is transported on a carrier film. This film is then applied to the barrel of the ballpoint pen using a hot stamping process. The data for creating the slide images should be high-resolution and in CMYK. When creating the data, please note the required size for the respective model. For foiling, 3 mm trim is required on the right and left.

DIGITAL PRINTING

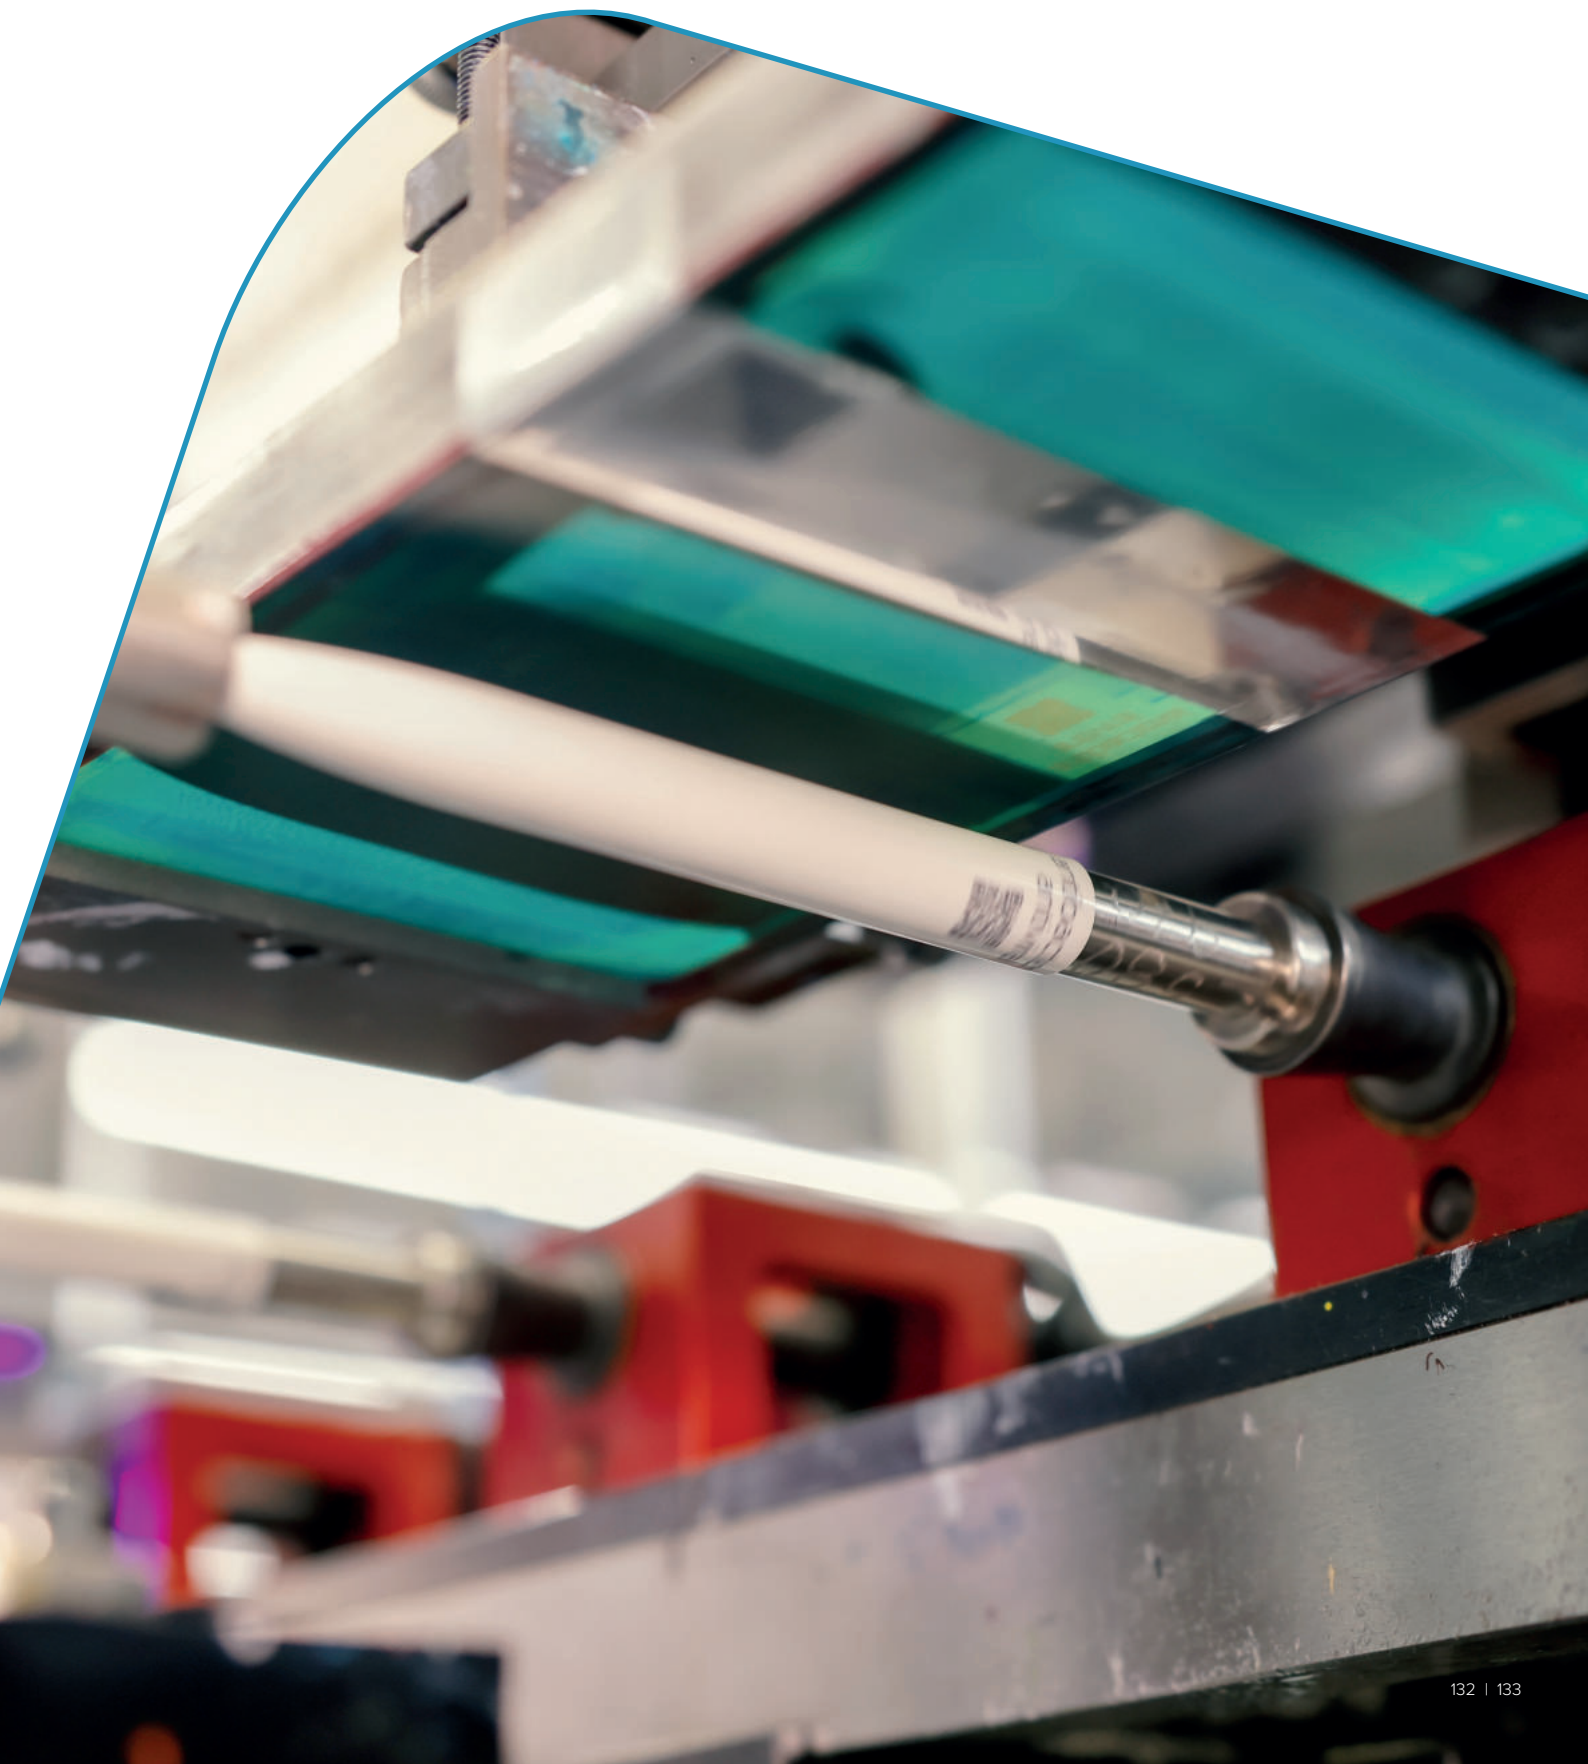

In this procedure, the logo is printed directly on the ballpoint pen. Digital printing is particularly suitable for multi-color logos and color gradients. The colors are converted into CMYK and therefore can differ slightly from the Pantone datas.

FILES

Please provide VECTOR FILES (Illustrator CS6) to ensure an optimal print image. Templates can be resized without losing quality. Any text in the print image must be converted to paths to avoid font issues.

Files that can also be used are PIXEL FILES (Photoshop). Please ensure that the print image is sufficiently high resolution (at least 600 dpi) and that the image is larger than the print area. This is the only way to guarantee a clean print result.

TISING

SALES SUPPORT

PENROLE

Sample presentation, with space for 40 writing instruments, divided into 8 groups of 5 pens each. It can be rolled up to a compact size.

COLOR CHIPS

Made of ABS plastic indicating color numbers. A useful tool for everyday work.

TAPE BAG

Custom presentation for up to five pens with a personalized insert. Perfect for trade fairs and promotions.

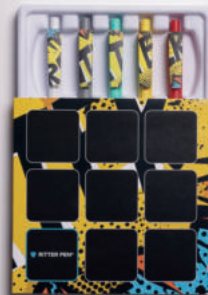

DISPLAY STAND

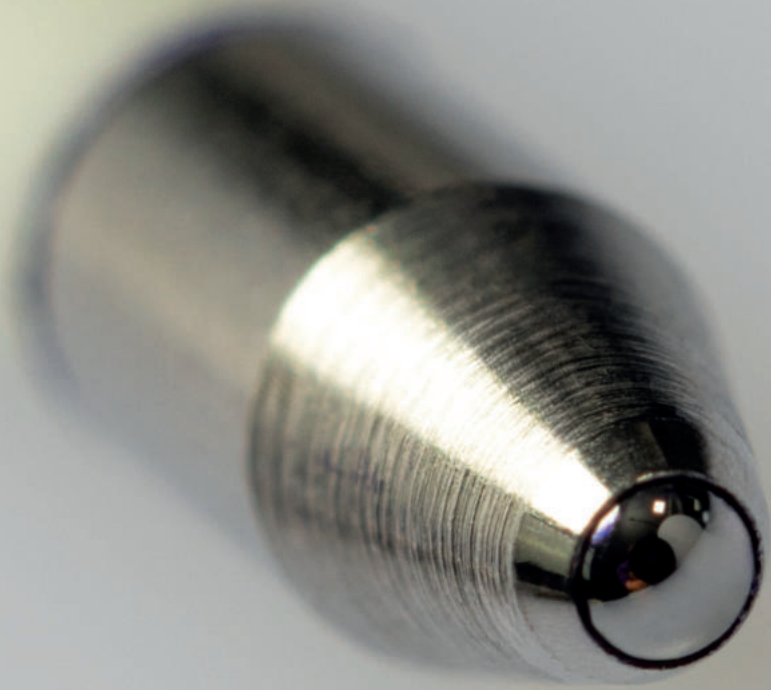

The eye-catching showroom solution with smart design: The display stand features an aluminum frame with two carriers for a Penrole and a 5-piece sample tableau with promotional graphic. Both can be easily removed via lock mechanism.

PROMOTION BOX

Includes tray and matching cover made from REINPAPIER – a bio-based material from recycled paper. Available for various model series.

»SIMPLY TOP-NOTCH!«

OUR MASTERPIECE

NOT JUST A BALLPOINT PEN, BUT A SYMBOL OF OUR COMMITMENT TO THE ENVIRONMENT AND THE FUTURE. AS ONE OF THE FIRST BALLPOINT PENS, MADE FROM POST-CONSUMER RECYCLED ABS PLASTIC, THE MASTERPIECE SETS NEW STANDARDS FOR MODERN BALLPOINT PEN PRODUCTION.

With its shiny stainless steel clip, the velvety soft-touch surface and the digitally printable barrel, it combines all the special features and innovations, that modern ballpoint pen production has to offer. Discover the masterpiece and be inspired by its uniqueness.

The **MASTERPIECE's** soft-touch surface not only gives it an aesthetically pleasing look, but also a unique feel. The velvety soft surface feels comfortable in the hand and makes writing a pleasant experience. Using the latest digital printing technology, individual designs and logos can be applied to the barrel – the masterpiece becomes an individual messenger.

The refill is the result of the latest technology and the highest quality standards. Made from recycled plastics and equipped with a stainless steel tip and a tungsten carbide ball, it offers a smooth writing experience and outstanding durability. With a writing length of up to 6,000 meters, the refill ensures that your masterpiece will serve you faithfully for a long time. Discover the perfection and sustainability of our refills and experience the pleasure of writing with the Masterpiece.
