

Elucidation to Certificate of Compliance 52778 U 20 Sulfiet 25

Regulation on materials and articles intended to come into contact with food are subject to constant updates based on the current state of science and analytical technics. This is introducing a trend to specify allowed applications more extensive.

The paper may stand in direct contact with dry and fatty foodstuffs. Further applications have to be evaluated separately.

The moist contact is restricted due to Aluminium migration above, the Limit (1 mg/l Water Extract) in the German BfR recommendation XXXVI of 01-12-2020.

The user of the paper needs to evaluate further application separately.
